

YMIX R-330 Piano

PRODUCT OVERVIEW

YMIX R-330 Piano is the easiest way to get the classic Roland P-330 Piano sounds right away! It comes with all 3 pianos from the original unit: Piano 1, Piano 2 and Piano 3!

Roland P-330 is known for its pristine Piano and Electric Piano sounds, that you probably heard in a ton of songs from the 80s and 90s, and is commonly mistaken by its older and bigger brother MKS-20, but also was powered with Clavinet, Harpsichord and Vibraphone sounds!

Carefully sampled from the original hardware, and with the minimum processing to maintain the original sound as true as possible, you will get an instrument that cuts through the mix, whether in the studio or in a live situation.

The instrument comes with built-in Eq and effects (4 band Eq, Chorus, Vibrato & Stereo Spread) based on the original hardware unit, to further sculpt or add atmosphere to the sounds.

The newly updated version 2.0 adds three amazing reverb IR's produced by YMIX Studios, to create a warming atmosphere, and a new user interface with all the piano sound in only one instrument, so you can mix the piano samples!

PLEASE ENSURE YOU HAVE THE FULL VERSION OF KONTAKT IT WILL NOT WORK IN THE FREE KONTAKT PLAYER
