

Thank you for purchasing the Timeshift soundbank!

Timeshift is a collection of 118 patches for Xfer Serum that revisits the golden age of '90s atmospheric drum & bass.

From the far reaches of the cosmos to the depths of the inner space, the sounds in this set are inspired by pioneering producers such as Omni Trio, Future Engineers, Blame and LTJ Bukem, as well as labels like Omni and Scientific Wax that continue to push the boundaries of the genre.

Inside you will find speaker rattling basses, ambient pads, deep soundscapes, jazzy electric keys, celestial bells, jungle and aquatic sound effects, space-age leads, silky strings and more.

All patches have parameters mapped to macros and modwheel, offering plenty of scope to make each sound your own.

INSTALLATION

Xfer Serum is required to open these presets.

To install the soundset, unzip the timeshift.zip file and copy the entire "Timeshift" presets folder to your Serum presets directory. To find that directory launch Serum and click "Menu" then "Open Serum Presets Folder". The default locations are:

WINDOWS

C:\Users*YOU*\Documents\Xfer\Serum Presets\Presets\

macOS

Macintosh HD/Library/Audio/Presets/Xfer Records/Serum Presets/Presets/

After installing Timeshift you may need to rescan before the presets are recognised. In Serum click "Menu" then "Rescan Folders on Disk". .

TIPS

- All Timeshift patches have modulation assigned to modwheel, and in some cases aftertouch too. Try using your keyboard's modwheel and aftertouch capabilities for expressive performances.
- All patches have parameters mapped to Serum's four macro knobs. Use the macros to subtly or dramatically sculpt the sound.
- Many patches are velocity sensitive, and the character of the sound will change depending how fast you press a key. The “default” sound is achieved by playing at maximum velocity.
