

Thanks for purchasing the “Cinesphere II” preset pack for **Omnisphere 2®**

About Cinesphere II

Most of presets have an obvious percussive almost attack sound due to the AMP envelope. If you wish to soften the sounds then a good solution is to increase the attack of the AMP envelope (and/or the filter envelope – the filter most of the times is modulated by a similar to AMP env “plucky” envelope.

A nice tip is to automate the Decay of the AMP envelope to add more body or movement to the overall sound.

MANUAL

Please unzip file and open **Omnisphere 2®** . Under the utility menu click “ **install.omnisphere** “ click ok and then choose the .omnisphere file “ **Vicious Antelope - Cinesphere II** “. After finishing the library will be added at “User Directories”

Patches were created with Omnisphere 2.8 and run best with this or newer edition

- Software 2.8.4d
- Soundsources v2.6.1c
- Patches v2.8.1c

Try to keep optimal levels of your synth tracks to avoid digital clipping from the synth's output for the best sounding results.
