

HEAT

By 22Bullets

HEAT is a saturation/distortion unit with ten different types of saturation/distortion that you can blend to your taste.

DRIVE

There are ten different types of saturation/distortion that you can select with the two drive bullets.

THE CHAMBER

You can spin the chamber to the left and the right to blend the selected saturation/distortion to your taste.

FILTER

The two filter bullets include a low and a high pass filter to filter out the unwanted frequencies in the two selected saturation/distortion types.

GAIN

Adjust the gain of the different saturation/distortion types separately.

MIX

The mix feature in the middle acts as a common mix control for the whole plugin. This allows for parallel usage.

IN & OUT

The input and output sliders allow you to control the input and the output volume of the plugin.

LOGO

The HEAT logo acts as a bypass control for the whole plugin, and is smoothed to be click and pop free for unhindered A/B testing.
