

NKS Installation:

1. Copy the content of folder "**image**" to:

- PC- C:\Users\Public\Public Documents\NI Resources\image\reaktor
- Mac- Mac HD\Users\Shared\NI Resources\image\reaktor

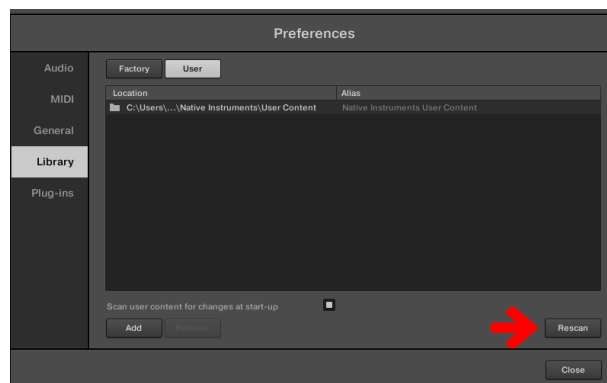

2. Copy the content of folder "**User Content**" to:

- PC- C:\Users\"username"\documents\Native Instruments\User Content
- Mac- Mac HD\Users\"username"\Documents\Native Instruments\User Content

3. After unzipping, copy the file "**C&S-Beatox.ens**" to:

- PC- C:\Users\Public\Public Documents\NI Resources (Create folder if not there)
- Mac- /Users/Shared/NI Resources (Create folder if not there)

Next step is to open Komplete Kontrol standalone and rescan User Library

Once installed, the presets will show up under the User section of the browser.

Specifically as a sub-bank of Reaktor
