

Installation:

Unzip the Nordic.zip and open Omnisphere 2. Under the “Utility” button click “Install .omnisphere” and select the Triple Spiral Audio – Nordic.omnisphere file.. **Please note this version requires Omnisphere 2.6 to be used.**

About Nordic:

Nordic is a new soundset for Omnisphere 2 with an ambient character, perfect for use in underscoring and use in film, game and library music productions and contains 128 presets and 25 multis. The soundset has found its inspiration in the beautiful nature and landscapes from Scandinavia. Originally this soundset had the worktitle Hardangervidda, named after a beautiful region in Norway. In this soundset you will find a lot of nature recordings and sounds that I have recorded during my travels in Norway, Sweden and Denmark. Nordic will contain the following kind of presets: APR + BPM, Bells and Vibes, Bowed Colors, Ethnic World, Guitars, Pads, Textures Playable and Textures Soundscapes.

In the presets there is an extensive use of the modwheel, aftertouch, pitchwheel and sometimes CC2 to enhance the sounds.

The soundset comes with 139 soundsources and is 514MB in size.

License Agreement:

All licenses are single-user licenses. The contents of this soundset is licensed and not sold to you. Ownership remains with Triple Spiral Audio. All rights of the producer and the owner of the work are reserved. Unauthorised duplication of any download is a violation of applicable laws.

You may not distribute, share, sublicense, lend, lease or otherwise make the soundset content available to any third party.

You may use the content of this soundset in your own productions. The included soundsources cannot be used to create new commercial preset releases.

Installing these products constitutes an agreement to the terms of this license.
